Implementation of Customs ICES 1.5 at CONCOR Terminals

Customs was having decentralized systems running at each of the ICD's, called ICES 1.0. Even under this setup, CONCOR had started exchanging EDI messages online with Customs long back at seven major ICD's.

Custom introduces ICES 1.5 at ICD/Dadri as their first implementation :-

Customs have now developed Centralized system for all ICD's called ICES 1.5 with central server at New Delhi. CONCOR's ICD/Dadri was the first depot in India where ICES 1.5 was implemented. Then recently, Customs have started implementing this system at other ICD's. Many of CONCOR ICD's have already become functional under ICES 1.5. Shortly, ICD/Tughlakabad will be under ICES 1.5.

Customs have designed EDI messages as per 1.5 version in coordination with CONCOR. CONCOR is the first and only organization among ICD's so far, to start transmitting centralized EDI messages online to Customs.

Customs would be covering all CONCOR ICD's under ICES 1.5.
